

Private Price Rate E3 - Supplies

1. Definition and application: Includes the supply of water, electricity or similar products provided by Ports de la Generalitat to users within the port area, with the prior request of the users, and for the use of the facilities necessary to provide them.

2. Compulsory subjects: users of the service are required to pay this price.

3. Price basis: The basis for the settlement of this price is determined by the number of supply units and must include, in addition to the consumptions made, all the fees, taxes and services that the supplying company establishes in its invoice .

4. Fee amount: The amount is generally fixed at 1.3 and 1.1 in the fishing industry, coefficients that will be applied on the basis of the price defined in the previous point.

5. Unique rules of application:

a) From electricity consumptions exceeding 30,000 kilowatts per year and water consumptions exceeding 2,000 cubic meters per year, a bonus of 50% will be applied, which corresponds to a general coefficient of 1.15 and 1.05 in the fishing industry.

b) The following organizations, bodies, entities and services listed below will be the recipients only of the transfer of the basis of the settlement that corresponds to them depending on the supply units, including all the costs that include the supply companies, as indicated in point 3, which is equivalent to applying a repercussion coefficient of 1:

i. The Red Cross, with respect to the activities entrusted to this institution in matters of maritime rescue, and other non-governmental organizations in cases of temporary employment linked to specific actions to rescue people or other humanitarian tasks.

ii. Legally established non-profit entities, whose activity is exclusively linked to the care of crew members and passengers.

iii. Bodies and entities of the public administrations that engage in surveillance, suppression of smuggling, rescue and fight against marine pollution activities, those related to national defence, the inspection and protection of the marine and coastal environment, the protection of fishing resources, the fight against illicit drug trafficking and public safety.

iv. For the general port services provided directly by Ports de la Generalitat to entities and public administrations when they engage in activities such as surveillance, suppression of smuggling, rescue and the fight against marine pollution and those related to defence, security or similar . v. For the specific port services regulated in Law 10/2019.

- c) In the event of a breakdown and as long as the supply installation is not repaired, invoicing will be by estimate.

These prices will come into force on 1 April 2024, once the repercussion coefficients have been modified in the Ports de la Generalitat computer invoicing program.

Approved by the Executive Committee of Ports of the Generalitat in an ordinary session held on 20 February 2024 and with effect from 1 April 2024.
